

Math Placement Guide

- Any student may place directly into Math Foundations with no placement tool.
- For each student, only one placement tool needs to be used. For example, a student may place with her/his transcript or the placement test, but not both.
- High school transcripts are only valid if the student completed the math class within the past three years.
- Students being placed using transcripts and from a two-semester course may be provisionally placed based on his/her first semester grade. However, final placement will be determined from the combined GPA of both semesters.
- Providing high school transcripts is voluntary. If no transcript is provided, she/he will need to be placed using another tool.
- For high school instructor recommendations, the recommendation form provided by UCC to local high schools is advised. However, email using the high school's email address to UCC's Math Dept. Chair could be used as well.
- Students taking the ALEKs test may re-take the test up to four extra times to attempt to increase her/his score.
